Summary

Information Technology undergraduate graduating in 2027 with hands-on experience building full-stack web applications and AI-powered software using JavaScript, Python, React.js, and Node.js. Experienced in REST API integration, data processing, debugging, and application development, with a strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and database management. Interested in building reliable, maintainable software and developing high-quality solutions through rigorous problem-solving and AI-assisted development.

Education

Netaji Subhash Engineering College **August 2023 – June 2027**
Bachelor of Technology in Information Technology ***(CGPA: 7.6)*** *Kolkata, West Bengal*

Experience

AI Web Development Intern **September 2026 - October 2026**
InAmigos Foundation *Remote*

- Developed and enhanced web-based solutions using AI-assisted development tools based on project requirements.
- Implemented and refined website features with a focus on responsive design, usability, and user experience.
- Collaborated remotely to complete assigned development tasks and deliver project work within deadlines.

Projects

Apple Customer Support AI Agent | *Python, Groq API, Pandas, NumPy, Streamlit* **September 2026**

- Built an AI-powered customer-support application using GPT-OSS-120B and historical support interactions to classify customer intent, retrieve relevant cases, and generate evidence-grounded responses.
- Implemented an automated AUTO HANDLE/ESCALATE decision layer, evaluated outputs using human-labeled datasets, and deployed an interactive Streamlit application.

Text To Image Generator | *React, Tailwind CSS, ClipDrop API* **September 2025**

- Developed an AI-powered image generation application using React, enabling users to generate visual content from descriptive text prompts.
- Integrated the ClipDrop API to process user input and render generated images through a responsive web interface.

Technical Skills

Programming Languages: Java, JavaScript, Python, C, SQL
Backend Development: Node.js, Express.js, REST APIs, API Integration
Frontend Development: React.js, HTML5, CSS3, Tailwind CSS
Databases: MongoDB, SQL
AI and Data Processing: LLM APIs, Generative AI, NumPy
Tools: Git, GitHub, Streamlit
Core CS: Data Structures and Algorithms, OOP, DBMS, Operating Systems

Certifications

- MERN Stack: All You Need to Know with Practical Project — Udemy (22 hours)
- Complete Bootstrap & React Bootcamp with Hands-On Projects — Udemy (13 hours)

Achievements

- Participated in Smart India Hackathon (SIH) 2025, collaborating in a team to develop a problem-statement–driven software solution under strict time constraints.
- Selected for HackNITR 7.0 at NIT Rourkela among 500+ teams; built a full-stack solution under 24 hours.
- Solved 150+ Data Structures and Algorithms problems on LeetCode.
- Practiced in The Big Code by Google and qualified the first round among 50,000+ participants.
